FCEC Partner Meeting on May 5

Posted by admin | April 30, 2010

FCEC is holding a Partners Meeting on May 5 at the Orange County Health Care Agency from 9am to 1pm.

The meeting will address a number of topics including outreach to fishermen (in light of the 2009 fish consumption advisory), community outreach and market inspection work. We'll also be discussing new outreach material our teams will be using.

FCEC Does Earth Day in Long Beach

Posted by admin | April 28, 2010

FCEC spent the 24th and 25th of April celebrating Earth Day at the wonderful [Aquarium of the Pacific in Long Beach](#). In all we were able to reach out to over 430 community members about fish contamination.

One of the people we spoke with was aware of the contamination on Palos Verdes Shelf and expressed a hopeful outlook, "I just go to the islands or San Clemente to go fishing," said Alfred of Simi Valley.

FCEC Does Earth Day in Long Beach

Posted by admin | April 28, 2010

FCEC spent the 24th and 25th of April celebrating Earth Day at the wonderful [Aquarium of the Pacific in Long Beach](#). In all we were able to reach out to over 430 community members about fish contamination.

One of the people we spoke with was aware of the contamination on Palos Verdes Shelf and expressed a hopeful outlook, "I just go to the islands or San Clemente to go fishing," said Alfred of Simi Valley.

"Over time we can hope to fix the contamination," he added.

Below is a video of one the youth we spoke to, four-year-old Yash, who can be seen here catching a fish in the FCEC's mock ocean. The popular game is a fun and educational way for kids to learn how to identify [local contaminated fish](#).

All in all it was a wonderful event! Educating the public is the cornerstone of the work we do. Were you at the event? If so we would love to hear what you thought of the event, and if you have any photos share them with us on our [open facebook page](#).
