

# Enforcement Program Update

Strategic Planning Meeting  
September 30, 2010

Sharon Lin  
U.S. EPA Region 9

# Presentation Summary

- Enforcement Program Results since June 2010
- Enforcement program meeting on May 27, 2010
- Monitoring program
- Challenges and opportunities

# Enforcement Program Results since June 2010

- Joint inspection with CDFG
  - City of Long Beach: 4
- Individual inspection
  - CDFG commercial vessel: 4
  - CDFG recreational: 30
  - City of Long Beach: 12
  - Orange County: 36

# Enforcement Program Meeting

- OC on May 27, 2010
- Focus of the market inspection will continue to be white croaker
- A new joint training is needed
- Joint inspection is helpful

# Monitoring Program

- Continue to monitor the contaminant levels in market fish and pier caught fish

# Challenges and opportunities

- Risk exposure pathway
- Adequacy of the existing catch ban
- Next year reassess the enforcement programs

# Review Tactics

Accomplished/completed:

- Develop commercial fishing regulation layout;
- Make catch ban regulations accessible.

# Review Tactics

In Progress/Ongoing:

- Reestablish/reevaluate catch ban area;
- County health departments conduct targeted market inspection;
- Increase enforcement of bag limit ;
- Coordinated efforts and effective communication with regulatory agencies;
- Assess the geographic extent and frequency with white croakers reaching fish markets

# Review Tactics

Have not done:

- Random sampling of white croaker at landing areas;
- Evaluate market availability of other contaminated fish caught locally, in addition to white croaker;
- Identify restaurants that regular sell white croaker and monitor and outreach to them.

# Discussion
