

FCEC
LACDPH Toxics Epidemiology Program
Strategic Planning Meeting
November 3, 2015

Eugene Loi, RN, PHN
Barbara DeRidder, RN, MSN
Evenor Masis, REHS
Robert Vasquez, REHS
Los Angeles County Department of Public Health

Task 1: Public Health Nurse Orientation

- Presentation to newly hired nurses at the quarterly orientations
 - Administer a session evaluation
 - Manage and analyze data
- Provide educational resources for the PHNs to distribute to patients and other interested clientele

Task 2:

Public Information Clearinghouse

- Continue to expand and update LACDPH's Toxics Epidemiology website information on:
 - Fish advisories
 - Educational materials
- Fill requests for fish contamination materials
 - CBOs
 - Health/Medical Professionals
 - General Public/Schools

Toxics Epidemiology Website

The screenshot shows a web browser window with the URL <http://publichealth.lacounty.gov/eh/TEA/ToxicEpi/fishcontamir>. The browser's address bar and menu are visible at the top. The website layout includes a search bar and a 'Service Locator' dropdown menu. On the left, there is a navigation menu under 'Environmental Health Programs' with links to various departments like 'Bureau of District Surveillance & Enforcement' and 'Bureau of Toxicology & Environmental Assessment'. Below this is a 'Tell Us How We're Doing' section with links for 'Service Quality Survey' and 'Quality Assurance'. The main content area is titled 'FISH CONTAMINATION' and contains sections for 'EDUCATIONAL MATERIAL', 'LINKS', and a detailed paragraph about the health benefits and risks of fish. An image of a plate of fish and vegetables is shown. A right sidebar contains an 'Email Us' link, a 'Pay for your Public Health Permit or License by credit card' section with details about payment methods and fees, and an 'Areas of Interest' section listing 'Air Quality', 'Beaches', 'Body Art', and 'Chemical Hazards'. The Windows taskbar at the bottom shows the time as 9:05 AM.
